

RAPID FACTORY DEPLOYMENT

PROJECT OVERVIEW:

- Austrak is a vertically integrated company
 - design PSC sleepers and turnout bearers
 - design factories
 - construct factories
 - commission factories
 - train employees
 - operate and maintain factories
 - refurbish, upgrade and expand factories
- In house resources undertake all activities
- Of eleven factories constructed to date one was overseas (S E Asia), five were in remote locations in Australia and five were adjacent to small country towns. Austrak has a reputation for servicing locations that are remote to help the client achieve best delivered cost of the sleeper
- Typical time frame from start to finish is five to nine months depending on number and speed of government approval hurdles
